

***Allowance***

Claims 31, 33-35, 38-61, 63-65, and 68-91 are allowed.

The following is an examiner's statement of reasons for allowance: The closest prior art teaches intrusion detection systems including IDS modules, intrusion analysis systems, and transparent forwarding to or communication with remote entities such that an attacker believes to be successfully attacking the system while is actually in communication with law enforcement or the like, gathering additional information about the attack and/or attacker. What the cited prior art (Comay, Pearson, Boebert, and Lyle) lacks is the distinct separation and handling of external intrusions into the network versus internal intrusions within the network by different intrusion detection systems.

Upon further search, Kouznetsov (U.S. Patent 6,725,377) was found to disclose separate monitoring servers for internal versus external intrusions (Column 11, lines 11-24). However, no legitimate combination of the references would teach all of the limitations Applicant's independent claims (31 and 61), such that one intrusion detection system will detect intrusions within the network while another detects intrusions into the network, forwarding information regarding such an intrusion to an analysis module, and performing distinct actions by the analysis module dependent upon whether the intrusion attempt was internal (within) or external (into) to the network.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

***Conclusion***

Any inquiry concerning this communication or earlier communications from the examiner should be directed to JEFFREY D. POPHAM whose telephone number is (571)272-7215. The examiner can normally be reached on M-F 9:00-5:30.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Emmanuel Moise can be reached on (571)272-3865. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
